TECHNICAL SPECIFICATIONS

Hot water supply required	The hot water supply should be 70% or more of the bath's total water capacity.
Turbine	Access to the pump must be at least 18" x 22". Standard connection is two (2) dedicated breakers: One is 20A, 120 V, 60 Hz, and the other 15A, 120 V, 60 Hz, dedicated lines with a GFCI. Air vent necessary: 2" x 4" minimum.
Others	<ul style="list-style-type: none"> - The Geysair® is located on the same side as the heated backrest. It must NOT be relocated. It must be connected to the hot water supply and be accessible (provide access). - Available with flat deck for raised deck. - There is a height difference for the flat deck (see drawing Detail A). - The water level will vary when an AromaFlow is installed.

Our products must be installed by certified professionals only and according to our Owner's Manual as well as federal, provincial/state and local building codes and regulations (www.bainultra.com/dealers/dealer-documentation-and-catalog).

The specifications shown indicate the outer edge dimension and the inside bathing capacity dimension measured at air jets' height. The manufacturer accepts a 1/4" [0.64 cm] variance. There are variations on each product and specifications are subject to change as we improve upon our product as required. The dimensions needed for site preparation and structure building will differ. BainUltra® assumes no responsibility for preparatory work done prior to the product being on site.

Cutting template	# 90000036
